## Theorist complains about missing citations - again!

By X. BARRY MENNS

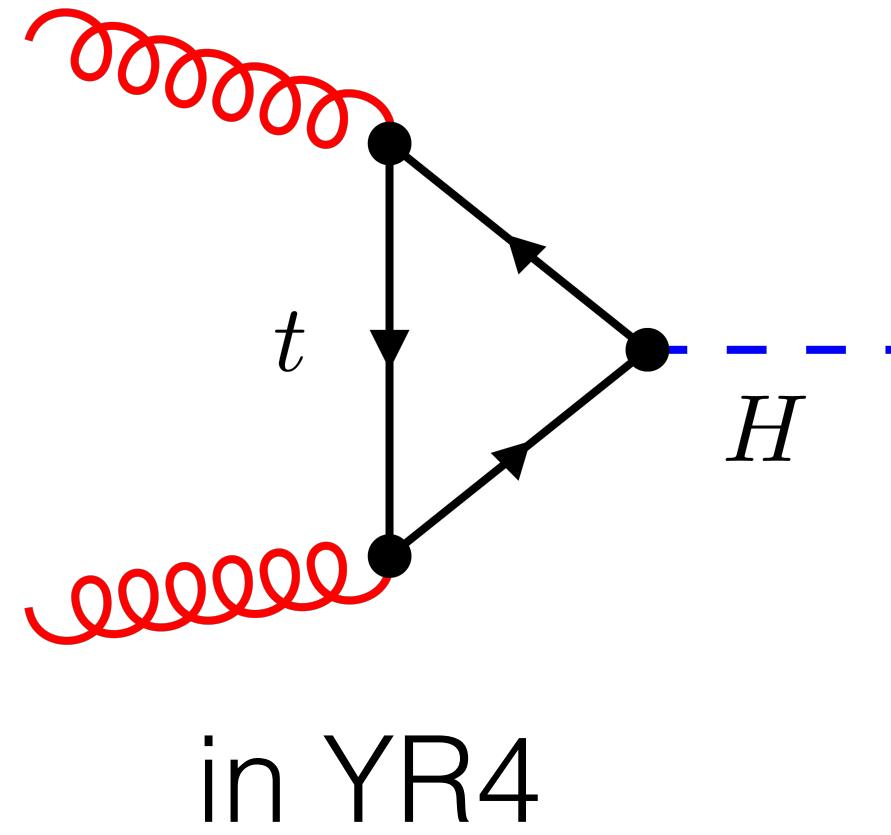

Renowned theorist Robert Harlander has raised concerns regarding missing citations in recent academic publications. In a recent interview, Harlander expressed his frustration, emphasizing the importance of proper attribution and intellectual integrity in the scientific community. Harlander, known for his groundbreaking contributions in the field, called for stricter adherence to citation standards to ensure accurate credit to original works. He urged researchers and authors to be diligent in acknowledging and referencing relevant sources, highlighting the significance of academic rigor and transparent scholarship. Harlander's critique has sparked a debate among scholars, prompting discussions on the responsible use of citations and the preservation of academic integrity.

## Higgs Boson Production in Association with a Top-Antitop Quark Pair in Next-to-Next-to-Leading Order QCD

#1

Stefano Catani (INFN, Florence and Florence U.), Simone Devoto (INFN, Milan and Milan U.),  
 Massimiliano Grazzini (Zurich U.), Stefan Kallweit (INFN, Milan Bicocca and Milan Bicocca U.),  
 Javier Mazzitelli (Munich, Max Planck Inst. and PSI, Villigen) et al. (Oct 14, 2022)

Published in: *Phys.Rev.Lett.* 130 (2023) 11, 111902 · e-Print: 2210.07846 [hep-ph]

# What I could not talk about .... Parton shower effects

**Parton-shower effects in Higgs production via Vector-Boson Fusion** #25  
Barbara Jäger (Tubingen U.), Alexander Karlberg (Oxford U., Theor. Phys.), Simon Plätzer (Vienna U.), Johannes Scheller (Tubingen U.), Marco Zaro (INFN, Milan) (Mar 27, 2020)  
Published in: *Eur.Phys.J.C* 80 (2020) 8, 756 • e-Print: [2003.12435](#) [hep-ph]

**NLO QCD+EW predictions for HV and HV +jet production including parton-shower effects** #63  
Federico Granata (Milan Bicocca U. and INFN, Milan Bicocca), Jonas M. Lindert (Durham U. and Durham U., IPPP), Carlo Oleari (INFN, Milan Bicocca and Milan Bicocca U.), Stefano Pozzorini (Zurich U.) (Jun 12, 2017)  
Published in: *JHEP* 09 (2017) 012 • e-Print: [1706.03522](#) [hep-ph]

**Next-to-next-to-leading order event generation for VH production with  $H \rightarrow b\bar{b}$  decay** #9  
Silvia Zanolli (Munich, Max Planck Inst.), Mauro Chiesa (Pavia U.), Emanuele Re (INFN, Milan Bicocca and Annecy, LAPTH), Marius Wiesemann (Munich, Max Planck Inst.), Giulia Zanderighi (Munich, Max Planck Inst. and Munich, Tech. U.) (Dec 8, 2021)  
Published in: *JHEP* 07 (2022) 008 • e-Print: [2112.04168](#) [hep-ph]

**NNLOPS accurate associated  $HZ$  production with  $H \rightarrow b\bar{b}$  decay at NLO** #48  
William Astill (Oxford U., Theor. Phys.), Wojciech Bizoń (Oxford U., Theor. Phys.), Emanuele Re (Annecy, LAPTH and CERN), Giulia Zanderighi (CERN and Oxford U., Theor. Phys.) (Apr 22, 2018)  
Published in: *JHEP* 11 (2018) 157 • e-Print: [1804.08141](#) [hep-ph]

**Higgsstrahlung at NNLL'+NNLO matched to parton showers in GENEVA** #35  
Simone Alioli (INFN, Milan Bicocca and Milan Bicocca U.), Alessandro Broggio (INFN, Milan Bicocca and Milan Bicocca U.), Stefan Kallweit (INFN, Milan Bicocca and Milan Bicocca U.), Matthew A. Lim (INFN, Milan Bicocca and Milan Bicocca U.), Luca Rottoli (INFN, Milan Bicocca and Milan Bicocca U.) (Sep 4, 2019)  
Published in: *Phys.Rev.D* 100 (2019) 9, 096016 • e-Print: [1909.02026](#) [hep-ph]

# What I could not talk about...

- HH
- off-shell Higgs production
- Higgs decays
- resummation
- EFT
- BSM
- ...

# Conclusions

# Conclusions

- SM Higgs sector is very (too?) simple...

# Conclusions

- SM Higgs sector is very (too?) simple...
- Precision Higgs physics could be the key to BTeV region

# Conclusions

- SM Higgs sector is very (too?) simple...
- Precision Higgs physics could be the key to BTeV region
- enormous theoretical progress since YR4

# Conclusions

- SM Higgs sector is very (too?) simple...
- Precision Higgs physics could be the key to BTeV region
- enormous theoretical progress since YR4
- NNLO standard,  $N^3LO$  in full swing

# Conclusions

- SM Higgs sector is very (too?) simple...
- Precision Higgs physics could be the key to BTeV region
- enormous theoretical progress since YR4
- NNLO standard,  $N^3LO$  in full swing
- progress in all production modes

# Conclusions

- SM Higgs sector is very (too?) simple...
- Precision Higgs physics could be the key to BTeV region
- enormous theoretical progress since YR4
- NNLO standard,  $N^3LO$  in full swing
- progress in all production modes
- take into account in analyses: LHCHWG is on it!
